DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DOD-2018-OS-0012]

Privacy Act of 1974; System of Records

**AGENCY:** Office of the Secretary of Defense, DoD.

**ACTION:** Notice of a modified System of Records.

**SUMMARY:** The Office of the Secretary of Defense proposes to modify a system of records, DUSDI 01-DoD, entitled the “Department of Defense (DoD) Insider Threat Management and Analysis Center (DITMAC) and DoD Component Insider Threat Records System.” This system enables DoD to implement the requirements of an Executive Order published on October 7, 2011, and the National Insider Threat Policy and Minimum Standards for Executive Branch Insider Threat Programs published on November 21, 2012. The system is used to analyze, monitor, and audit insider threat information for insider threat detection and mitigation within DoD on threats that insiders may pose to DoD and U.S. Government installations, facilities, personnel, missions, or resources. The system supports the DITMAC and DoD Component insider threat programs, enables the identification of systemic insider threat issues and challenges, provides a basis for the development and recommendation of solutions to mitigate potential insider threats, and assists in identifying best practices amongst other Federal Government insider threat programs.

**SUPPLEMENTARY INFORMATION:** E.O. 13587 directs the implementation of a Department-wide insider threat detection and prevention program. The DoD Insider Threat Program is decentralized to enable DoD component insider threat programs and the DITMAC to analyze, monitor, and audit threat information for insider threat detection and mitigation within

DoD. The Program deters insider activity that endangers DoD and U.S. Government installations, facilities, personnel, missions, or resources.

Section 951 of the National Defense Authorization Act for Fiscal Year 2017 (NDAA for FY17) expanded the definition of an insider threat to anyone who has, or once had, authorized access to information, a facility, a network, a person, or a resource of the Department. In keeping with this expansion, the Department is taking a measured approach and expanding the ability of its Component insider threat programs and the DITMAC to store inside threat related information on those personnel with a DoD Common Access Card (CAC). This expansion strengthens the intent of E.O. 13587 and maintains a responsive posture to the NDAA for FY17.

This modification to the system of records enables the Department to comply with E.O. 13587 by expanding the population to include personnel who have been issued an active DoD CAC to authenticate physical access to DoD installations or logical access to DoD controlled information systems.

This revision leverages existing federal laws, statutes, authorities, policies, programs, systems, architectures and resources in order to counter the threat of those insiders who may use their authorized access to compromise or degrade the operations of the Department. The Department and its insider threat programs employ risk management principles, tailored to meet the distinct needs, mission, and systems of its agencies, and include appropriate protections for privacy, civil rights, and civil liberties. The change captures this large community of persons in a phased and reasonable manner, by enabling the DoD population to include those with CACs in addition to those who have or are granted eligibility for access to classified information or eligibility to hold a sensitive position

The Office of the Secretary of Defense notices for systems of records subject to the Privacy Act of 1974, as amended, have been published in the Federal Register and are available from the address in FOR FURTHER INFORMATION CONTACT or at the Defense Privacy, Civil Liberties, and Transparency Division website at <http://dpcl.d.defense.gov/>.

The proposed systems reports, as required by of the Privacy Act, as amended, were submitted on November 17, 2017, to the House Committee on Oversight and Government Reform, the Senate Committee on Homeland Security and Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to Section 6 to OMB Circular No. A-108, "Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act," revised December 23, 2016 (December 23, 2016, 81 FR 94424).

Dated: March 16, 2018.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

**PURPOSE(S) OF THE SYSTEM:** The DITMAC was established by the Undersecretary of Defense for Intelligence to consolidate and analyze insider threat information reported by the DoD Component insider threat programs.

The DoD maintains this system of records to assist in the management of the DoD Component insider threat programs and the DITMAC in accordance with E.O. 13587 and Section 951 of the FY 2017 National Defense Authorization Act (NDAA for FY17). E.O. 13587 requires Federal agencies to establish an insider threat detection and prevention program to ensure the security of classified networks and the responsible sharing and safeguarding of classified information

consistent with appropriate protections for privacy and civil liberties. Section 951 of the NDAA for FY17 requires that DoD insider threat programs collect, store, and retain information from various data sources, including personnel security, physical security, information security, law enforcement, counterintelligence, user activity monitoring, information assurance, and other appropriate data sources to detect and mitigate potential insider threats.

Insider threats can contribute damage to the United States through espionage, terrorism, unauthorized disclosure of national security information, including protected and sensitive information, or through the loss or degradation of departmental resources or capabilities. The system will be used to analyze, monitor, and audit insider threat information for insider threat detection and mitigation within DoD on threats that persons who have or had been granted eligibility for access to classified information or eligibility to hold a sensitive position and those who have been issued an active DoD Common Access Card (CAC) to obtain physical or logical access to a DoD installation or controlled information system may pose to DoD and U.S. Government installations, facilities, personnel, missions, or resources.

The system will support DoD Component insider threat programs, enable the identification of systemic insider threat issues and challenges, provide a basis for the development and recommendation of solutions to deter, detect, and/or mitigate potential insider threats. It will assist in identifying best practices among other Federal Government insider threat programs, through the use of existing DoD resources and functions and by leveraging existing authorities, policies, programs, systems, and architectures.
